4 to 20 mA Analogue Transmitter Board

Alphasense "B" Type Toxic & O2-A2 Oxygen Sensors

Alphasense 4-20mA analogue transmitters offer the following features:

- Factory calibration, custom-set for immediate use
- Wide operating voltage range
- Low RFI susceptibility

Alphasense 4-20 mA analogue transmitter boards provide a cost effective way for Original Equipment Manufacturers to engineer transmitter heads for fixed installation systems. The range of sensors are shown below. Transmitters are supplied with pre-calibrated sensors.

The 4-20 mA output signal performance is as shown on individual sensor data sheets.

To allow OEMs to distinguish their product from other offerings, the sensor to gas aperture design is left to the OEM to execute.

Optional fitting kit and connector/leads are available on request (Fig 2)
